

# What is the relationship between alcohol consumption and postnatal growth patterns, sleep patterns and/or psychomotor patterns of the offspring? (DGAC 2010)

## Conclusion

Limited evidence suggests that alcohol consumption during lactation was associated with altered postnatal growth, sleep patterns and/or psychomotor patterns of the offspring.

## Grade: Limited

Overall strength of the available supporting evidence: Strong; Moderate; Limited; Expert Opinion Only; Grade not assignable For additional information regarding how to interpret grades, [click here](#).
